

New records of long-legged flies (Diptera, Dolichopodidae) from Tyva Republic (Russia, Siberia)

I.Ya. Grichanov

All-Russian Institute of Plant Protection, Podbelskogo 3, St. Petersburg, Pushkin, 196608 Russia

E-mail: grihanov@mail.ru

During a 2017 survey conducted in the Tyva Republic of Russia, 322 specimens of Dolichopodidae have been collected. All 36 identified species are recorded for the first time in the Tyva Republic, including two probably undescribed species. *Asyndetus longicornis* is a new species for Siberia; Mongolian *Melanostolus longipilosus* and *Thinophilus setosus* are found for the first time in Russia. In total, 16 genera and 41 (including three unnamed) species are known from Tyva.

Key words: Dolichopodidae; Tyva Republic; new records

Introduction

Many natural zones of the Earth are present in the Tyva (or Tuva) Republic having several mountain systems. Its biodiversity is shaped by the geographical location in the centre of Asia, between the east-Siberian taiga and central-Asian landscape. Average annual precipitation varies here from 150 mm (on plains) to 1,000 mm (in mountains). The summer is moderately warm in mountains, and hot in depressions (about +25–35°C).

In the case of long-legged flies, the territory of the Tyva Republic remains undercollected, with very few research articles devoted to this land (Negrobov et al., 2013; Grichanov, 2017). The first record of a dolichopodid fly (*Medetera signaticornis* Loew, 1857) from the Republic was published by V.M. Yanovskii (1976). *Medetera asiatica* Negrobov et Zaitzev, 1979 was described from this territory (Ishtii-Khem, Ulug-Khemskiy District) (Negrobov, 1979) and reported later from Kyrgyzstan. Negrobov & Barkalov (2010) described a new species *Dolichopus selivanovae* from the Altai Mountains including the lakes Muzdy-Bulak, Dzhulukul (Republic of Altai) and Khindiktig-Khol (Tyva). Negrobov et al. (2010) found *Hydrophorus zaitzevianus* Negrobov, 1976 at the Khindiktig-Khol Lake; the species was described originally from Mongolia.

The material for this study (322 specimens) has been collected by Dr. N.E. Vikhrev, M. Yanbulat (Moscow) and Dr. O.E. Kosterin (Novosibirsk) during a 2017 expedition by standard sweep net mostly. The main collection sites are located in the central Tyva: Piy-Khem Kozhuun (Uyuk River), Kaa-Khem Kozhuun (Kaa-Khem River and Serebryanka River), Tanda Kozhuun (salt Lake Dus-Khol, Lake Khadyn, Mazhalyg River), and Tes-Khem Kozhuun (Eastern Tannu-Ola mountains, Tes-Khem River). This paper presents the new species records in detail. Records of 36 species listed below are arranged alphabetically by genus. Information on the world distribution for each species listed follows Grichanov (2017). The type localities are provided and the country lists are arranged alphabetically. Material of the newly-recorded species will be deposited at the Zoological Institute of the Russian Academy of Sciences, St. Petersburg, and the Zoological Museum of Moscow State University, Moscow, Russia. Specimens collected by Vikhrev and Yanbulat are mounted on pins and placed in the museum drawers. Specimens collected by Kosterin are kept in vials aggregated in glass cans filled with alcohol. Photos of some habitats for species newly recorded from the Tyva Republic are kindly provided by Oleg Kosterin.

New records of Dolichopodidae

Asyndetus Loew, 1869

***Asyndetus longicornis* Negrobov, 1973**

MATERIAL. Dus-Khol salt Lake, 700 m, 51.36° N, 94.45° E, 2-5 vii 2017, N. Vikhrev, 1♂; Tanda Kozhuun, brackish Lake Khadyn, the western bay, saline, 51.365° N, 94.469° E, 708 m a.s.l., 2 vii 2017, O. Kosterin, 1♀.

DISTRIBUTION. Type locality: Mongolia: "Mongolei, Südgobi aimak, 40 km SSO von Nomagon, Salzbodenwiese, in der Nähe von der Wasserquelle". Palaearctic: China (Inner Mongolia), Hungary, Kazakhstan, Mongolia, ?Romania, Russia (Astrakhan), Tajikistan, Turkmenistan, Uzbekistan. New for Siberia.

Campsicnemus Haliday, 1851***Campsicnemus armatus armatus* (Zetterstedt, 1849)**

MATERIAL. Tes-Khem Kozhuun, 16 km SWS of Samagaltay village, the Tes Khem River right floodplain, grassy poplar forest, 50.470° N, 94.892° E, 1001 m a.s.l., 4 vii 2017, O. Kosterin, 1♂.

DISTRIBUTION. Type locality: Denmark: Rosenthal. Gryphium. Palaearctic: Austria, Belgium, Czech, Denmark, Finland, France, Germany, Iceland, Ireland, Italy, Mongolia, Netherlands, Norway, Poland, Russia (Arkhangelsk, Kamchatka, Karelia, Krasnoyarsk, Murmansk, Nenetsia, Ekaterinburg, Tatarstan, Yakutia, Yamalia), Slovakia, Sweden, Turkey (Kars), UK.

Chrysotus Meigen, 1824***Chrysotus cilipes* Meigen, 1824**

MATERIAL. Uyuk River, 800 m, 52.07° N, 94.04° E, 1-3 vii 2017, N. Vikhrev, 1♂; Kaa-Khem Kozhuun, 18 km E of Kyzyl, the Kaa-Khem River left bank floodplain at the bridge, larch/poplar forest, 51.706° N, 94.712° E, 639 m a.s.l., 3 vii 2017, O. Kosterin, 3♀.

DISTRIBUTION. Type locality: Germany: Hamburg. Palaearctic: Abkhazia, Armenia, Austria, Azerbaijan, Belgium, Bosnia and Herzegovina, Bulgaria, China, Czech Republic, Estonia, Denmark, Finland, France, Germany, Hungary, Ireland, Italy, Japan, Kazakhstan, Korea, Latvia, Lithuania, Luxembourg, Mongolia, Netherlands, Norway, Poland, Portugal (Madeira), Romania, Russia (Adygea, Altai Rep., Altai Terr., Astrakhan, Blagoveshchensk, Buryatia, Chita, Irkutsk, Kabardino-Balkaria, Karachai-Cherkessia, Karelia, Khabarovsk, Krasnodar, Krasnoyarsk, Moscow, Leningrad, Novgorod, Novosibirsk, Pskov, Rostov, Sakhalin, Tomsk, Vladivostok, Voronezh, Yakutia), Slovakia, Spain, Sweden, Switzerland, Turkey, UK, Ukraine.

***Chrysotus gramineus* (Fallén, 1823)**

MATERIAL. Kyzyl env., poplar forest, 51.7° N, 94.7° E, 5-7 vii 2017, N. Vikhrev, 1♂.

DISTRIBUTION. Type locality: not given [Sweden]. Palaearctic: Abkhazia, Andorra, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, China; Czech Republic, Denmark, Estonia; Finland, France, Georgia, Germany, Greece, Hungary, Ireland, Italy, Korea, Kyrgyzstan, Latvia, Lithuania, Moldova, Netherlands, Norway, Poland, Romania, Russia (Adygea, Alania, Altai Rep., Arkhangelsk, Bashkortostan, Blagoveshchensk, Buryatia, Chelyabinsk, Chita, Chukotka, Crimea, Irkutsk, Kabardino-Balkaria, Karachai-Cherkessia, Karelia, Khabarovsk, Kostroma, Krasnodar, Krasnoyarsk, Kursk, Leningrad, Lipetsk, Mordovia, Moscow, Murmansk, Novgorod, Orel, Orenburg, Pskov, Ryazan, Sakhalin, Tatarstan, Tomsk, ?Ural, Vologda, Voronezh, Yakutia, Yaroslavl), Slovakia, Spain, Sweden, Switzerland, Tajikistan, Turkey (Hakkari, Erzurum, Kars), Turkmenistan, UK, Ukraine (Cherkasy, Kharkiv, Kherson).

Dolichopus Latreille, 1796***Dolichopus brevipennis* Meigen, 1824**

MATERIAL. Piy-Khem Kozhuun, Uyuk River floodplain at Uyuk village. 52.073° N, 94.043° E, 794 m a.s.l., 30 vi – 5 vii 2017, O. Kosterin, 5♂, 3♀; Uyuk River, 800 m, 52.07° N, 94.04° E, 1-3 vii 2017, N. Vikhrev, 1♂; Mazhalyg River, 880 m, 50.98° N, 95.18° E, 4 vii 2017, N. Vikhrev, 1♂; Tes-Khem Kozhuun, a pass through the Eastern Tannu-Ola Mts., grassy seepage in spruce taiga patch, 50.621° N, 95.193° E, ~1440 m a.s.l., 4 vii 2017, O. Kosterin, 1♂.

DISTRIBUTION. Type locality: Sweden. Palaearctic: Austria, Belarus, Belgium, China (Xinjiang), Czech Republic, Denmark, Estonia, Finland, France, Germany, Ireland, Italy, N Kazakhstan, Latvia, Lithuania, Netherlands, Norway, Poland, Russia (Adygea, Altai Rep., Altai Terr., Arkhangelsk, Baskortostan, Buryatia, Irkutsk, Kabardino-Balkaria, Karelia, Khantia-Mansia, Krasnodar, Kirov, Komi, Leningrad, Moscow, Murmansk, Novgorod, Omsk, Orenburg, Perm, Pskov, Ryazan, Tomsk, Tyumen, Voronezh, Yaroslavl, Vladivostok, Yakutia), Sweden, UK; Nearctic: Canada and USA: Alaska, Yukon, British Columbia, Northwest Terr., Montana, Alberta, Saskatchewan, Quebec, Prince Edward Is, Newfoundland (Labrador).

***Dolichopus calceatus* Parent, 1927**

MATERIAL. Kaa-Khem Kozhuun, 18 km E of Kyzyl, Serebryanka River in the Kaa-Khem River left bank floodplain at the bridge, larch/poplar forest, 51.701° N, 94.707° E, 638 m a.s.l., 6 vii 2017, O. Kosterin, 1♂, 1♀.

DISTRIBUTION. Type locality: Russia: "Transbaikale; Pjetchanka, b. Tschita". Palaearctic: China, Kazakhstan, Russia (Altai Rep., Blagoveshchensk, Buryatia, Chita, Irkutsk, Kamchatka, Khabarovsk, Tomsk, Vladivostok, Yakutia).

***Dolichopus caligatus* Wahlberg, 1850**

MATERIAL. Piy-Khem Kozhuun, Uyuk River floodplain at Uyuk village. 52.073° N, 94.043° E, 794 m a.s.l., 30 vi – 5 vii 2017, O. Kosterin, 3♂.

DISTRIBUTION. Type locality: "Koonprope Marstrand, Gusum Ostrogothiae" [Sweden]. Palaearctic: Austria, Denmark, Finland, Germany, Lithuania, Netherlands, Norway, Russia (Karelia, Khabarovsk, Leningrad), Sweden, UK.

REMARKS. The species was placed for a long time in synonymy to *Dolichopus flavipes* Stannius, 1831, was not included into the main keys (Stackelberg, 1930; Negrobov & Stackelberg, 1969) and was probably recorded from Russia (Irkutsk, Buryatia, Yakutia, Krasnoyarsk, Russian Far East) and Alaska under the name *D. flavipes* (having type locality Marseille, France).

***Dolichopus claviger* Stannius, 1831**

MATERIAL. Kyzyl env., poplar forest, 51.7° N, 94.7° E, 5-7 vii 2017, N. Vikhrev, 1♂; Kaa-Khem Kozhuun, 18 km E of Kyzyl, Serebryanka River in the Kaa-Khem River left bank floodplain at the bridge, larch/poplar forest, 51.701° N, 94.707° E, 638 m a.s.l., 6 vii 2017, O. Kosterin, 3♂, 2♀.

DISTRIBUTION. Type locality: Germany: Hamburg. Palaearctic: Austria, Belarus, Belgium, Bulgaria, Czech, Denmark, Estonia, Finland, France, Germany, Hungary, Ireland, Lithuania, Netherlands, Norway, Poland, Romania, Russia (Adygea, Alania, Altai Terr., Altai Rep., Crimea, Kabardino-Balkaria, Karelia, Karachai-Cherkessia, Krasnodar, Krasnoyarsk, Leningrad, Lipetsk, Magadan, Moscow, Novgorod, Perm, Pskov, Ryazan, Tatarstan, Tomsk, Vologda, Voronezh), Slovakia, Sweden, Switzerland, UK, Ukraine (Cherkasy, Kharkiv, Kyiv, "Yugoslavia").

***Dolichopus divisus* Becker, 1917**

MATERIAL. Tes-Khem Kozhuun, a pass through the Eastern Tannu-Ola Mts., grassy seepage in spruce taiga patch, 50.621° N, 95.193° E, ~1440 m a.s.l., 4 vii 2017, O. Kosterin, 1♂.

DISTRIBUTION. Type locality: Russia: "Urga, Irkutsk". Palaearctic: China, Mongolia, Russia (Irkutsk).

***Dolichopus fraterculus* Zetterstedt, 1843**

MATERIAL. Piy-Khem Kozhuun, Uyuk River floodplain at Uyuk village. 52.073° N, 94.043° E, 794 m a.s.l., 30 vi – 5 vii 2017, O. Kosterin, 1♀; Tanda Kozhuun, salt Lake Dus-Khol, E bank, saline, 51.357° N, 94.446° E, 702 m a.s.l., 2 vii 2017, O. Kosterin, 2♀; Tes-Khem Kozhuun, a pass through the Eastern Tannu-Ola Mts., grassy seepage in spruce taiga patch, 50.621° N, 95.193° E, ~1440 m a.s.l., 4 vii 2017, O. Kosterin, 1♀.

DISTRIBUTION. Type locality: Sweden: Jemtlandia meridionali, Asarne. Palaearctic: Finland, Lithuania, Norway, Sweden, Russia (Altai Rep., Karelia, Kuril Is., Magadan, Murmansk, Yamalia, Yakutia); Nearctic: Canada and USA: Alaska, Northwest Terr.

***Dolichopus galeatus* Loew, 1871**

MATERIAL. Uyuk River, 800 m, 52.07° N, 94.04° E, 1-3 vii 2017, N. Vikhrev, 1♂.

DISTRIBUTION. Type locality: Russia: "Sibirien". Palaearctic: Russia (Blagoveshchensk, Buryatia, Irkutsk, Kamchatka, Khabarovsk, Magadan, Yakutia), China (Heilongjiang).

***Dolichopus griseifacies* Becker, 1917**

MATERIAL. Piy-Khem Kozhuun, Uyuk River floodplain at Uyuk village. 52.073° N, 94.043° E, 794 m a.s.l., 30 vi – 5 vii 2017, O. Kosterin, 6♂, 2♀.

DISTRIBUTION. Type locality: Russia: "Irkutsk, Sibirien". Palaearctic: Russia (Blagoveshchensk, Buryatia, Irkutsk, Khabarovsk, Vladivostok).

***Dolichopus latipennis* Fallén, 1823**

MATERIAL. Uyuk River, 800 m, 52.07° N, 94.04° E, 1-3 vii 2017, N. Vikhrev, 1♂.

DISTRIBUTION. Type locality: [Sweden:] "Paroeciae Farhult Scaniae". Palaearctic: ?Austria, Belgium, Czech, Denmark, Estonia, Finland, France, Germany, Ireland, Latvia, Netherlands, Norway, Poland, Sweden, UK, N Russia (Karelia, Murmansk, Nenets), E Russia (Altai Rep., Buryatia, Irkutsk, Kamchatka, Novosibirsk, Sakhalin, Yakutia), Mongolia, China (Qinghai); Nearctic: Canada (Quebec, Northwest Terr.).

***Dolichopus linearis* Meigen, 1824**

MATERIAL. Kaa-Khem Kozhuun, 18 km E of Kyzyl, Serebryanka River in the Kaa-Khem River left bank floodplain at the bridge, larch/poplar forest, 51.701° N, 94.707° E, 638 m a.s.l., 6 vii 2017, O. Kosterin, 4♂, 7♀; Kaa-Khem Kozhuun, 18 km E of Kyzyl, the Kaa-Khem River left bank floodplain at the bridge, larch/poplar forest, 51.706° N, 94.712° E, 639 m a.s.l., 3 vii 2017, O. Kosterin, 1♂, 3♀; Tes-Khem Kozhuun, a pass through the Eastern Tannu-Ola Mts., grassy seepage in spruce taiga patch, 50.621° N, 95.193° E, ~1440 m a.s.l., 4 vii 2017, O. Kosterin, 7♂, 12♀; Tes-Khem River, 1000 m, 50.47° N, 94.91° E, 4 vii 2017, N. Vikhrev, 3♂.

DISTRIBUTION. Type locality: not given. Palaearctic: Austria, Belgium, China (Heilongjiang, Jilin, Beijing, Inner Mongolia, Gansu, Xinjiang, Qinghai), Czech Republic, Denmark, Estonia, Finland, France, Georgia, Germany, Hungary, Ireland, Italy, Kazakhstan, Latvia, Mongolia, Netherlands, Norway, Poland, Romania; Russia (Adygea, Altai Rep., Blagoveshchensk, Buryatia, Irkutsk, Kamchatka, Khabarovsk, Khantia-Mansia, Krasnodar, Krasnoyarsk, Leningrad,

Magadan, Novosibirsk, Novgorod, Pskov, Ryazan, Sakhalin, Tatarstan, Vladivostok, Vologda, Voronezh, Yakutia), Slovakia, Sweden, Switzerland, UK.

Kosterin, 1♂, 4♀.

DISTRIBUTION. Type locality: not given. Palaeartic: Austria, Belgium, Bosnia and Herzegovina, Bulgaria, Czech, Denmark, Estonia, Finland, France, Germany, Hungary, Ireland, Italy, Karelia, Kazakhstan, Latvia, Lithuania, Luxembourg, Netherlands, Norway, Poland, Romania, Russia (Altai Rep, Altai Terr., Buryatia, Krasnodar, Krasnoyarsk, Mordovia, Moscow, Novgorod, Novosibirsk, Pskov, Ryazan, Tatarstan, Ural, Voronezh), Serbia, Slovakia, Sweden, Switzerland, Turkey (Canakkale), UK, Ukraine (Chernovtsy, Kyiv, Lviv, Poltava, Uzhhorod).

Hercostomus Loew, 1857***Hercostomus fulvicaudis* (Haliday, 1851)**

MATERIAL. Kaa-Khem Kozhuun, 18 km E of Kyzyl, Serebryanka River in the Kaa-Khem River left bank floodplain at the bridge, larch/poplar forest, 51.701° N, 94.707° E, 638 m a.s.l., 6 vii 2017, O. Kosterin, 1♀; Tes-Khem Kozhuun, a pass through the Eastern Tannu-Ola Mts., grassy seepage in spruce taiga patch, 50.621° N, 95.193° E, ~1440 m a.s.l., 4 vii 2017, O. Kosterin, 3♀.

DISTRIBUTION. Type locality: England. Palaeartic: Austria, Belgium, China, Czech, Estonia, France, Germany, Hungary, Iran, Netherlands, Poland, Romania, Russia (Lipetsk, Novosibirsk, Voronezh), Slovakia, Sweden, Switzerland, Tajikistan, Turkey (Afyonkarahisar, Kütahya), Turkmenistan, UK, Ukraine (Kherson, Odessa, Uzhhorod).

Hydrophorus* Fallén, 1823**Hydrophorus* sp.**

MATERIAL. Tanda Kozhuun, salt Lake Dus-Khol, E bank, saline, 51.357° N, 94.446° E, 702 m a.s.l., 2 vii 2017, O. Kosterin, 3♂, 6♀; Tes-Khem Kozhuun, a pass through the Eastern Tannu-Ola Mts., grassy seepage in spruce taiga patch, 50.621° N, 95.193° E, ~1440 m a.s.l., 4 vii 2017, O. Kosterin, 1♀.

REMARKS. The material examined belongs most probably to an undescribed species.

Medetera* Fischer von Waldheim, 1819**Medetera jacula* (Fallén, 1823)**

MATERIAL. Uyuk River, 800 m, 52.07° N, 94.04° E, 1-3 vii 2017, N. Vikhrev, 3♂.

DISTRIBUTION. Type locality: Sweden: Scania. Palaeartic: Armenia; Austria, Azerbaijan; Belarus, Belgium, Czech, Denmark, Estonia, Finland, France, Georgia; Germany, Hungary, Iran, Ireland, Italy, N Kazakhstan, Latvia, Lithuania,

Netherlands, Norway, Poland, Romania; Russia (Alania, Altai, Buryatia, Irkutsk, Chechnya, Crimea, Kabardino-Balkaria, Kaluga, Karelia, Krasnodar, Kursk, Leningrad, Mordovia, Moscow, Novgorod, Novosibirsk, Pskov, Rostov, Ryazan, Stavropol, Urals, Vologda, Voronezh, Yakutia); Slovakia, Sweden, Switzerland, Tunisia, Turkey (Antalya), UK, Ukraine (Kharkiv, Kherson, Luhansk, Odessa, Poltava).

***Medetera pallipes* (Zetterstedt, 1843)**

MATERIAL. Dus-Khol salt Lake, 700 m, 51.36° N, 94.45° E, 2-5 vii 2017, N. Vikhrev, 1♂.

DISTRIBUTION. Type locality: Scania, "in Ostrog ad Wadstena; Botnia orientali ad Johannis Ro prope Tornea" [Sweden; Denmark]. Palaearctic: Austria, Belgium, Czech, Denmark, Egypt, Estonia, Finland, France, Georgia, Germany, Greece, Hungary, Iran, Israel, Morocco, Netherlands, Norway, Poland, Romania, Russia (Adygea, Chechnya, Crimea, Kabardino-Balkaria, Karelia, Krasnodar, Leningrad, Novgorod, Pskov, Ryazan, Stavropol, Voronezh), Slovakia, Spain, Switzerland, Sweden, Turkey (Antalya, Hakkari, Kars), UK, Ukraine (Kherson). The easternmost point of distribution.

***Melanostolus* Kowarz, 1884**

***Melanostolus longipilosus* Negrobov, 1985**

MATERIAL. Kaa-Khem Kozhuun, 18 km E of Kyzyl, the Kaa-Khem River left bank floodplain at the bridge, larch/poplar forest, 51.706° N, 94.712° E, 639 m a.s.l., 3 vii 2017, O. Kosterin, 1♀; Dus-Khol salt Lake, 700 m, 51.36° N, 94.45° E, 2-5 vii 2017, N. Vikhrev, 1♂; Tanda Kozhuun, brackish Lake Khadyn, the western bay, saline, 51.365° N, 94.469° E, 708 m a.s.l., 2 vii 2017, O. Kosterin, 1♂.

ADDITIONAL MATERIAL. W Yakutia: env. Tumul, 60 km N vil. Suntar, Kyukei Lake, N 62°43'38", E 117°45'44", 27.06.2011, L. Sivtseva, 1♂ (ZIN); Altai Rep., Kosh-Agach env., 50.01° N, 88.66° E, 1750 m, 2-4 vii 2016, Vikhrev, 2♂.

DISTRIBUTION. Type locality: Mongolia: [Altai Mts.] Bajan-Olgij. Palaearctic: Mongolia. New for Russia.

REMARKS. The males from the Altai Republic fully correspond to the original description of *M. longipilosus* (Negrobov, 1985). The material from Tyva and a male from Yakutia have some fine differences from the typical form and can represent an undescribed species.

Neurigona Rondani, 1856

***Neurigona davshinica* Negrobov, 1987**

MATERIAL. Kyzyl env., poplar forest, 51.7° N, 94.7° E, 5-7 vii 2017, N. Vikhrev, 1♂.

DISTRIBUTION. Type locality: Russia: Barguzin Reserve, Davshe. Palaearctic: Russia (Buryatia).

***Rhaphium* Meigen, 1803**

***Rhaphium* sp.**

MATERIAL. Kaa-Khem Kozhuun, 18 km E of Kyzyl, the Kaa-Khem River left bank floodplain at the bridge, larch/poplar forest, 51.706° N, 94.712° E, 639 m a.s.l., 3 vii 2017, O. Kosterin, 1♀; Tes-Khem Kozhuun, 16 km SWS of Samagaltay village, the Tes Khem River right floodplain, grassy poplar forest, 50.470° N, 94.892° E, 1001 m a.s.l., 4 vii 2017, O. Kosterin, 1♀.

REMARKS. Sibling *Rhaphium* species are hardly distinguished by females.

***Scellus* Loew, 1857**

***Scellus gallicanus* Becker, 1909**

MATERIAL. Tes-Khem Kozhuun, a pass through the Eastern Tannu-Ola Mts., grassy seepage in spruce taiga patch, 50.621° N, 95.193° E, ~1440 m a.s.l., 4 vii 2017, O. Kosterin, 1♂.

DISTRIBUTION. Type locality: France: Lautaret. Palaearctic: China, France, Mongolia, Russia (Altai Rep., Murmansk, Sayan Mnts., Irkutsk, Yakutia).

***Sympycnus* Loew, 1857**

***Sympycnus changaicus* Negrobov 1973**

MATERIAL. Uyuk River, 800 m, 52.07° N, 94.04° E, 1-3 vii 2017, N. Vikhrev, 3♂; Piy-Khem Kozhuun, Uyuk River floodplain at Uyuk village. 52.073° N, 94.043° E, 794 m a.s.l., 30 vi – 5 vii 2017, O. Kosterin, 1♀.

DISTRIBUTION. Type locality: Mongolia: "Archangaj aimak, Gebirgspas Egijn davaa". Palaearctic: Mongolia, Russia (Altai Rep., Buryatia, Chita, Yakutia).

***Sympycnus pulicarius* (Fallén, 1823)**

MATERIAL. Kaa-Khem Kozhuun, 18 km E of Kyzyl, Serebryanka River in the Kaa-Khem River left bank floodplain at the bridge, larch/poplar forest, 51.701° N, 94.707° E, 638 m a.s.l., 6 vii 2017, O. Kosterin, 3♂, 3♀; Tes-Khem Kozhuun, a pass through the Eastern Tannu-Ola Mts., grassy seepage in spruce taiga patch, 50.621° N, 95.193° E, ~1440 m a.s.l., 4 vii 2017, O. Kosterin, 1♀.

DISTRIBUTION. Type locality: not given [Sweden]. Nearctic: USA: California; Palaearctic: Andorra, Austria, Azerbaijan, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Czech, Denmark, Estonia, Finland, France, Georgia, Germany, Greece, Hungary, Iran, Ireland, Italy, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Luxembourg, Macedonia, Moldova, Mongolia, Netherlands, Norway, Poland, Portugal, Romania, Russia (Alania, Altai Rep., Altai Ter., Buryatia, Chechnya, Chelyabinsk,

Crimea, Kabardino-Balkaria, Kaliningrad, Karachai-Cherkessia, Karelia, Khakassia, Krasnodar, Krasnoyarsk, Leningrad, Lipetsk, Moscow, Murmansk, Novgorod, Novosibirsk, Pskov, Stavropol, Sverdlovsk, Tambov, Tatarstan, Voronezh, Yakutia), Serbia, Slovakia, Spain incl. Canary Islands, Sweden, Switzerland, Tajikistan, Turkey (Aydin, Bolu, Mugla, Van), UK, Ukraine (Kherson), Uzbekistan.

***Tachytrechus* Haliday, 1851**

***Tachytrechus vinogradovi* Stackelberg, 1941**

MATERIAL. Tanda Kozhuun, salt Lake Dus-Khol, E bank, saline, 51.357° N, 94.446° E, 702 m a.s.l., 2 vii 2017, O. Kosterin, 5♂, 2♀; Tanda Kozhuun, brackish Lake Khadyn, the western bay, saline, 51.365° N, 94.469° E, 708 m a.s.l., 2 vii 2017, O. Kosterin, 1♂, 1♀.

DISTRIBUTION. Type locality: Russia: "Transbaikalien, Ivan-See bei Tshita". Palaearctic: Kazakhstan, Mongolia, Russia (Buryatia, Chita).

***Thinophilus* Wahlberg, 1844**

***Thinophilus* sp.**

MATERIAL. Tanda Kozhuun, salt Lake Dus-Khol, E bank, saline, 51.357° N, 94.446° E, 702 m a.s.l., 2 vii 2017, O. Kosterin, 19♂, 20♀; Tanda Kozhuun, brackish Lake Khadyn, the western bay, saline, 51.365° N, 94.469° E, 708 m a.s.l., 2 vii 2017, O. Kosterin, 12♂, 18♀; Dus-Khol salt Lake, 700 m, 51.36° N, 94.45° E, 2-5 vii 2017, N. Vikhrev, 1♂, 1♀.

REMARKS. The material examined belongs most probably to an undescribed species.

***Thinophilus flavipalpis* (Zetterstedt, 1843)**

MATERIAL. Tanda Kozhuun, salt Lake Dus-Khol, E bank, saline, 51.357° N, 94.446° E, 702 m a.s.l., 2 vii 2017, O. Kosterin, 3♂; Dus-Khol salt Lake, 700 m, 51.36° N, 94.45° E, 2-5 vii 2017, N. Vikhrev, 2♂.

DISTRIBUTION. Type locality: Sweden: Gottlandia, Bursviken. Palaearctic: Austria, Azerbaijan, Belgium, Bulgaria, N. China, Croatia, Czech, Denmark, Egypt, Estonia, Finland, France, Germany, Greece (Crete, North Aegean), Hungary, Iran, Israel, Italy, Kazakhstan, Kyrgyzstan, Moldova, Mongolia, Morocco, Netherlands, Poland, Portugal, Romania, S. Russia (Astrakhan, Crimea, Krasnodar, Rostov), Spain, Sweden, Syria, Turkey (Ankara), UK, Ukraine (Kherson, Odessa); Oriental: China.

***Thinophilus setosus* Negrobov, 1979**

MATERIAL. Tanda Kozhuun, salt Lake Dus-Khol, E bank, saline, 51.357° N, 94.446° E, 702 m a.s.l., 2 vii 2017, O. Kosterin, 3♂; Dus-Khol salt Lake, 700 m, 51.36° N, 94.45° E, 2-5 vii 2017, N. Vikhrev, 3♂.

DISTRIBUTION. Type locality: Mongolia: Bajan-Chongorskij aimak, am Nordufer des Orog-Nuursees. Palaearctic: Mongolia. New for Russia.

REMARKS. At present, it is not possible to identify five females collected together with closely related *Thinophilus flavipalpis* and *T. setosus*.

***Thrypticus* Gerstaecker, 1864**

***Thrypticus bellus* Loew, 1869**

MATERIAL. Dus-Khol salt Lake, 700 m, 51.36° N, 94.45° E, 2-5 vii 2017, N. Vikhrev, 1♂; Tanda Kozhuun, salt Lake Dus-Khol, E bank, saline, 51.357° N, 94.446° E, 702 m a.s.l., 2 vii 2017, O. Kosterin, 1♀.

DISTRIBUTION. Type locality: England: Kew. Afrotropical: DR Congo, Kenya, Ethiopia, Senegal, South Africa, St. Helena, Tanzania. Palaearctic: Abkhazia, Armenia, Austria, Azerbaijan, Belgium, Bosnia and Herzegovina, Bulgaria, China, Croatia, Czech, Denmark, Egypt, Finland, France, Germany, Greece, Hungary, Iran, Ireland, Israel, Golan Heights, Italy, Kazakhstan, Lithuania, Morocco, Netherlands, Poland, Romania, Russia (Krasnoyarsk, Leningrad, Novosibirsk, Rostov, Vladivostok, Voronezh), Slovakia, Spain, Sweden, Switzerland, Turkey (Erzurum, Kars, Mugla), UK, Ukraine (Odessa).

Conclusion

As a result of this study, a new material of Dolichopodidae was identified, and a check-list of Tyvan species was compiled. The present research gives new records, including 34 species found for the first time in the Republic, and two probably undescribed species. *Asyndetus longicornis* is a new species for Siberia; Mongolian *Melanostolus longipilosus* and *Thinophilus setosus* are found for the first time in Russia. In total, 16 genera and 41 (including three unnamed) species are known from Tyva. Almost all species were collected along banks of rivers and lakes (see Figs. 1–6); nevertheless, *Medetera* and *Neurigona* species inhabited tree trunks (N.E. Vikhrev, pers. comm.).

Most collected species are widespread across the Palaearctic Region. At present, the Tyva Republic is the easternmost area of distribution for the dendrophilous *Medetera pallipes*. The following twelve species are not known in Europe: *Dolichopus calceatus*, *D. galeatus*, *D. griseifacies*, *D. pospelovi*, *D. selivanovae*, *Hydrophorus zaitzevianus*, *Medetera asiatica*, *Melanostolus longipilosus*, *Neurigona davshinica*, *Sympycnus changaicus*, *Tachytrechus vinogradovi* and *Thinophilus setosus*.
