

# INSTRUCTIONS TO AUTHORS OF "KHIMIYA RASTITEL'NOGO SYR'IA" (CHEMISTRY OF PLANT RAW MATERIAL)

## *General provisions*

In the journal "Khimii rastitel'nogo syr'ia" (Chemistry of plant raw material) publishes original scientific reports, reviews, short communications and letters to the editor, devoted to the chemistry of the processes occurring in the chemical recycling as a plant complex as a whole and its individual components, creating a fundamentally new and effective technological processes of complex processing vegetable raw materials or improving existing ones.

The log includes the following sections:

- The composition, structure and properties of wood biomass.
- The composition, structure and properties of the components of non-wood plants (annuals, algae, peat).
- Basic Research transformation components of plant raw materials in industrial processes for the production of cellulosic materials.
- Transformation components of tree biomass in the physico-chemical and microbiological processes.
- Physiologically active compound based on vegetable raw materials.
- Modern chemical and physico-chemical analysis methods, properties, and process control of complex chemical processing of vegetable raw materials and biomass components.
- Chemistry and technology of pulp and paper products from wood and non-wood raw materials, organic and inorganic fibers.
- Environmental problems of technological processes of complex chemical processing of a biomass plant raw materials.
- Problems of education in the field of chemistry and technology of vegetable raw materials.
- The new equipment and technology for the processing of vegetable raw materials in the pulp and paper industry.

One of the main policies of the magazine - the publication of original articles that meet the standards of a high scientific quality.

The journal publishes information on past conferences, schools and other events of national and international scientific life.

Periodicity - 4 times a year.

## *Presentation of Items*

Article submitted to the journal only through the electronic document via the website of the journal <http://chemwood.asu.ru>. To do this, you need to register on the site and follow the instructions. For more tips on working with the system to the site.

The working languages of the journal are Russian and English. Article in Russian necessarily have the English translation of titles, abstracts, keywords, authors' names transcription.

## *The procedure for the consideration of article*

After receiving the paper is reviewed, then the Editorial Board shall determine the desirability of publication of the communication.

## *Article structure*

The article should contain the following elements: UDC; Title of article; Initials and names of the authors; The organization where the work, mailing address, city, zip code, country, e-mail; Abstract of the article (150-200 words); Keywords.

The article should include the following sections: introduction; experimental part; discussion of the results; conclusions; reading list in the order of citation.

The structure of the review article and a brief message in the content part is not regulated.

## *Annex to Article*

To file articles must always be accompanied by:

1. Information about each author, including: last name, first name; place of work; position; a degree; academic title; e-mail (e-mail); work address, phone, fax. You must specify to whom the authors of the need to maintain correspondence.

2. The title of the article, abstract and keywords in English.

4. The act of examination of the organization (in due form), in which the work is done.

5. To the article can be represented by an e-mail application, which can provide additional information (the primary experimental data, spectra, photos, techniques, etc.). Perhaps in the electronic annex to post multimedia information (video, animation).

More detailed rules for authors are available on the website of the journal <http://chemwood.asu.ru>
